

Fusion® – discover the infinite possibilities

As a revolutionary concept in surface design, Laminex® Fusion® Surfaces offer choice, infinite possibilities, greater flexibility and more ease-of-use than ever before. The Laminex Fusion Design Source range offers an extensive selection of exclusive designs, which include photo-realistic, abstract images, 3D forms, illustrations and natural or man-made textures.

The exclusive, renewed range now offers over 300 pre-created designs, with 29 inspiring additions. It is made up of graphic patterns, ornate and decorative designs, nature inspired as well as illustrative styled decors and whimsical paisleys.

Laminex Fusion Surfaces has been formulated to provide not only fresh innovative options, but also all of the necessary design solutions for any modern home application; from wet areas in the bathroom or laundry, through to wall panels and counter tops – there are designs to suit any interior application.

Laminex Fusion Design Source boasts a distinct design aesthetic, complete with memorable and unique touches that can fit harmoniously within any interior application, making any space or object visually exciting

There are unlimited possibilities presented by Laminex Fusion Surfaces. Fusion Customart® offers the option to design your own individual graphic image and have it applied to any laminate surface, bringing with it the ability to transform a space by incorporating a live and personal element. Fusion Solids offers over 350 colours – one of the largest laminate ranges available, along with a collection of Fusion Wall murals, which provide large-scale images of landscapes and nature.

Laminex Fusion Surfaces are extremely durable, able to withstand constant wear, resistant to staining and can be constructed with minimal visible joins. Laminex is committed to continually providing creative, yet practical solutions for interior spaces.

All Fusion laminates are custom-made in quantities of one sheet, to thousands and can be specifically ordered by calling 0800 303 606. More information is available at www.laminex.co.nz

Colour Notes by Judy Dymond

The twenty nine inspirational new designs created for Fusion Design Source each reflect a strong design direction that is relevant to the world of interiors. Each will enhance the design library and provide an improved resource for those seeking contemporary, exciting digitally printed design solutions of a genre not available from the more mainstream Laminex Colour Palette.

These new additions take inspiration from the world that surrounds and excites us inclusive of nature, street art, decorative and ornate pattern, graphic markings, tattoos and other cultures. The contemporary and the classic inform one another to create the new.

PASSIONFLOWER-

A stylised floral design interpreted in simple flowing style with a modern take on the botanical. Coloured in warm pinks and orange or alternatively in organic tones of yellow influenced greens.

SECRET GARDEN-

Layers of leaves and flower heads in shades of grey, create a shadow play straight from the garden. Illusion of three dimensional form comes to life with a modern touch.

ROSELAND-

The beauty of luscious roses is given a makeover in this large-scale design created in a pixelated manner. Tonal shades of pinks and reds combine with varying greens to create drama and glamour.

JUNGLEFEVER-

Fronds and leaves of different scales are intermixed, suggestive of imaginary green places such as forests and jungles, to immerse ourselves in the depths of nature. All shades of verdant greens are mixed together in this design.

BUTTERFLIES-

The illustrative style of the background in grey lead pencil is the ideal complement for the brilliant blue/green colouration of the butterflies. Depicted in different sizes and positions, butterflies fly freely across the design, expressing our fascination with the natural world.

WINGPOWER-

The suggestion of the freedom of flight in a sketchy style of silhouette creates a freshness of look and pureness of form in either endless skies of blue or purity of space and line.

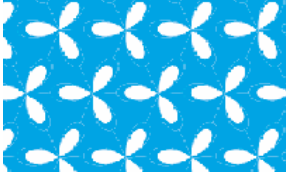

TATTOO FISH-

The influence of other cultures and Japanese graphic pattern is seen in this design, using fluid lines reminiscent of water and fishy form. While, red, blue and black colour choices enhance the simplicity and essence of the design.

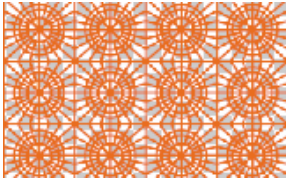

ADRENALIN-

Graphic black and white contrast in an energy charged treatment, where random patterning and mesmerizing movement come together.

CONNECT-

Propeller type shapes are represented in repetitive rhythmic flow, with an instinctively positive colour play in vibrant yellow, blue, green or pilot grey.

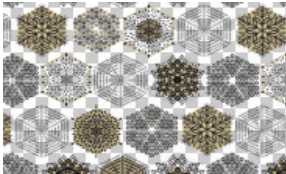

CASABLANCA-

Moroccan influences of screens and ironwork, in a striking silhouette of positive and negative patterns are teamed with colours of classic black, citrus green, tangerine or smoke colouration.

FRACTURED-

Irregular shapes come together in this large scale design and play with colour tones of khaki and camouflage greens to give flow and movement.

IDEOGRAM-

Geometric shapes with detail reminiscent of snowflake structure. The hexagon forms medallion like, with intricate and fascinating line work. It comes in cool sophisticated greys or the warmth of bronze tones.

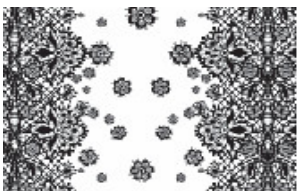

PAISLEY-

With an arabesque curved form, classic in derivation stylised for today with exquisite execution, this pattern returns to create interest and value with soft tonal grey colourations, or of black and white.

VERSAILLES-

A decorative and ornate design with flowing classic motifs has been reinterpreted for today. Nostalgic references in perfect proportion and sensual shapes are coloured in timeless layering of either cool or warm greys.

MANTILLA-

Lace like references are exaggerated and simplified with a focus on definition and fragmentation. This design showcases the power of dark and light in classic black and white or the newness of pewter and white.
